## flat roofing trade service

Since 1986 we've been permanently solving roofing problems for builders and designers. Our Permadeck flat roofing system has so many advantages over other systems that once you've seen it fitted you too will be convinced. **You build it, we seal it, we guarantee it.** And you'll never see the roof again.

Check out our website and be amazed - the more complicated the design the more impressed you'll be.

### So what is Permadeck?

Permadeck is a 'second generation' seamless twin-resin polyester with glass fibre reinforcing. The whole system with its integral edge trims has been developed and improved since it was first BBA certified in 1992. Thousands of installations since then have proven its performance and ability to permanently seal the most complex details.

Permadeck is guaranteed 20 years.

As well as being extremely durable, Permadeck is incredibly versatile. It can be laid from horizontal to vertical. It can MOULD around anything, comes in ANY COLOUR and is approved by the BBA for BALCONY use. It meets all the BUILDING REGS for roof waterproofing so Permadeck can be a COLD or a WARM roof. It can also be a GREEN roof or a WETROOM sublayer.

For the site builder/joiner there are many advantages. Permadeck needs only simple deck preparation (eg no doubling rails or tilting fillets) and internal troughs and rooflights are easy to accommodate as are level changes, pipes and vents.

When the deck is ready we can seal up to 100 sqm a day! This lets internal work get on sooner.

The client can choose the colour, they get their 20 year guarantee and you'll never see the roof again.

Call us today, we're here to help you get the job done.

Permadeck + insulation = **Thermadeck®**

Full details of Thermadeck on our website

## New works of all sizes

We appreciate the pressure designers and builders are under, our website has a whole section of technical information:-

[www.seamlessroofing.co.uk](http://www.seamlessroofing.co.uk)

Click the 'Architectural' button and, of course, we'll be pleased to discuss your design at any time.

**BBA certified "to show no loss of physical properties for 30 years."**

No matter what shape the roof is or how intricate the details, Permadeck will seal it. And if you're up against a dead-line we'll work with you to meet it.

## Refurbs of all sizes

Refurbishment can be more critical than new-builds, so you need a contractor you can rely on. Seamless Roofing's Permadeck system is fast and instantly effective.

If you're up against time, weather and occupied property we'll do whatever we can to help you get the job done as soon as possible.

All information and advice is given in good faith and should be checked by a competent person or confirmed with Building Control as necessary. Permadeck and Thermadeck are registered trade marks of Seamless Roofing Ltd.
